**ТОРМОЗНЫЕ
КОЛОДКИ**

**ТОРМОЗНЫЕ
НАКЛАДКИ**

Тормозные колодки **GoodWill®** можно с уверенностью отнести к автотзапчастям, соответствующим требованиям автопроизводителей. При производстве тормозных колодок используются современные технологии, инновационные решения и материалы, направленные на обеспечение:

- надёжного торможения;
- хорошей и быстрой прирабатываемости с тормозным диском;
- стабильного коэффициента трения в широком диапазоне изменения температуры, давления и скорости;
- оптимальной износостойкости;
- экологической безопасности (безасбестовые технологии, отсутствие вредных металлов);
- комфорта (каждый комплект тормозных колодок имеет шумопоглощающую пластину);
- повышенной стойкости к коррозии.

Высокое качество тормозных колодок подтверждено испытаниями, проведенными в лаборатории № 5 ИЦПА (НАМИ) г. Москвы. Испытания проводились на соответствие жестким требованиям к тормозным системам и подтверждены официальным протоколом испытаний.

Маркировка тормозных колодок, накладок **GoodWill®**:

- 1***F** – **Front** – Передние для легковых автомобилей
- 2***R** – **Rear** – Задние для легковых автомобилей
- 2***RB** – **Rear** – Задние для легковых автомобилей накладки
- 3***FR** – **Front/Rear** – Передние/задние для легковых автомобилей
- 5***F** – **Front track** – Передние для грузовых автомобилей
- 5***R** – **Rear track** – Задние для грузовых автомобилей
- S** – **Sensor** – Сенсор/датчик

Примечание: **GoodWill®** рекомендует производить замену тормозных колодок парами (левая и правая сторона), а при замене тормозных дисков устанавливать новый комплект тормозных колодок. Следует учитывать, что новые колодки или пара трения (Тормозная колодка / Тормозной диск) требуют притирки для выхода на запланированную эффективность торможения, которая происходит примерно через 200–300 км пробега.
